Message from the Thai Hip and Knee Society
Hip & Knee Section
The Royal College of Orthopaedic Surgeons of Thailand

On the inauguration of the Thai Hip and Knee Society in the year 2009 with the continuing academic activities of the Hip & Knee Section and the Sports Medicine Section, The Royal College of Orthopaedic Surgeons of Thailand (RCOST), we are very determined to organize a supplement issue of the “Journal of the Medical Association of Thailand”. This special orthopedic issue contains multiple selected orthopedic studies on joint and sports medicine, as well as special review articles and case reports. All selected articles have been submitted by our Thai Orthopaedic Members under the intensive peer-reviewing of a large group of academic orthopedic experts.

As this is our first experience in gathering multiple manuscripts from our members and in undergoing reviewing steps for articles selection and revision, there have been some technical problems which affected a longer time than that of our previous plan for the whole process of publication. However, finally, we have come to the destination where we are able to have a total of 46 well selected articles in this special issue. Following the publication of this supplement issue, I believe that it would call more attention among Thai Orthopedic Surgeons on more academic publications besides just focusing on proceeding of their careers.

On the behalf of Thai Hip and Knee Society and the Hip & Knee Section of the RCOST, I would like to express my deep appreciation to all the contributing authors, co-authors, the editor-in-chief and the editorial board, the peer reviewers, staff of the RCOST and the staff of the Journal of the Medical Association of Thailand who have pushed very much their efforts to complete this supplement issue.

Aree Tanavalee, MD
The Thai Hip and Knee Society
Hip & Knee Section
The Royal College of Orthopaedics Surgeons of Thailand
Message from the Sports Medicine Section
The Royal College of Orthopaedic Surgeons of Thailand

Sports Medicine has significant growth within the last ten years in our country. Our organization has successfully developed several educational courses, knee and shoulder cadaveric workshop, basic to advance level to support the enthusiastic surgeons. This journal is the one of an academic motivation and research promotion for our colleagues who interest in Sports Medicine research.

This supplement issue is creative and pleasurable journal that includes specific interests of a Arthroplasty, Sports Medicine and several specialties with evidence - based reports by young or well-experienced researchers. I am certain that these articles will be considered as the motivation and information simultaneously for all of us and be the further step of our orthopedic research.

Please accept this note of thanks that I herely extend to everyone at Royal College of Orthopedic Surgeons of Thailand (RCOST), committees and members of Sports Medicine, all reviewers and editors for all their helps and support during the very difficult time before this journal has been completed.

Suraphol Kesprayura, MD
Chairman of Sports Medicine Section, RCOST
It’s my pleasure to be invited and take function as an editor-in-chief of this first supplement issue of the Royal College of Orthopaedic Surgeons of Thailand (RCOST) published in the Journal of the Medical Association of Thailand. The chairman and committer members of both the Hip & Knee and the Sports medicine section of RCOST had played important roles in initiating, stimulating and also supporting the publication of this supplement issue with the aim to help the young Thai orthopaedic surgeons in publishing their studies in an international journal. This activity will encourage our members to do more research study with higher quality up to the international standard, as well.

It’s unexpected to have so many submitted papers for this special issue, the peer review team finally accepted forty-three original articles, two case-reports and one review article, covering mainly in the field of hip or knee surgery and sports medicine, for publication. The deputy editor and all reviewers have tremendously pushed all their effort to edit and make all these articles perfect. I am confident that all studies published in this supplement will contribute to the better knowledge of orthopaedic surgery in our country, our region and the international community.

I wish to take this opportunity to express my sincere gratitude to all reviewers and the secretarial group for their valuable contribution and co-operation leading to the success of this supplement issue publication.

Professor Sukit Saengnipanthkul, MD
Executive vice-president of RCOST
Editor - in - chief

A guide for contributors

Manuscripts are to be sent to the office of the Editor-in-Chief. The procedures listed below must be followed carefully. Use the checklist to ensure completeness.

For ethical purpose and good review of previous studies by Thai researchers or of previous publication in the Thai peer-review journals, it is prudent for your article to cite:
1. Thai researchers who previously studied and published article of the same field or interest.
2. Thai peer-reviewed Journals that published original article(s) of the same field or interest.

Manuscript Preparation: The original typescript, in print and on data file diskettes (CD only) must be submitted, including copies of all illustrations, legends and references. All must be typed double-spaced on 8.5” x 11” (A4) white bond paper. Margins must be at least 1 inch. Only a word processor should be used. Metric measurements are to be used throughout the text and illustrative materials. Generic names for drugs are to be used. Brand names may be included in parentheses.

Titles: The title must be short, specific, and clear. The title page should be typed on a separate sheet and include the full name, degree and academic affiliations of all authors.

Abstracts: Submit abstracts in duplicate, both in English and Thai, which must include a concise statement in not more than 150 words of what was done, what was found and what was concluded.

Illustrations and Tables: Use only illustrations that clarify and augment the text. Submit illustrations in duplicate, unmounted, and untrimmed. High contrast, glossy-prints (not photocopies) are requested. Original drawings should be professionally drawn in black India ink. Figure number, name of senior author, and arrow indicating “top” should be typed on a gummed label and affixed to the back of each illustration. All lettering must be legible after reduction to column size. Each table should be typed double-spaced on a separate sheet, and should supplement rather than duplicate the text. They should be numbered consecutively as mentioned in the text and each must have a heading. Color illustrations will be published at the author’s expense.

References: References should be listed in consecutive order as they are cited in the text, not alphabetically. Once a reference is cited, all subsequent citations should be running in queue to the original number. All references must be cited in the text or tables. Unpublished data and personal communication are not accepted. Use the form of references and the titles of journals abbreviated, according to the style used in Index Medicus.

Manuscript Acceptance: Manuscripts are received with the understanding that they are not under simultaneous consideration by another publication. Accepted manuscripts become the property of the Journal of the Medical Association of Thailand and may not be published elsewhere without permission from the publisher (The Medical Association of Thailand).

Annual Subscription Rates:
- Members of Med Assoc Thai: Free
- Non-Members Local: 1,000 Baht
- Non-Members Overseas (Surface-Mail): US$ 180
- Medical Students: 200 Baht
- Single Copies: 100 Baht

Correspondence:
All correspondence concerning Journal subscriptions, orders for copies or reprints, notices of change of address, complaints, advertising should be addressed to the office of the Editor-in-Chief at the address provided.

Checklist for Authors:
- Three copies of manuscript.
- Three copies of abstract. (Thai and English)
- Three copies of attached photographs, legends, and/or illustrations, clearly marked as described in the instructions.
- One data file diskette.
- The address and telephone number of the designated contributing author.
